Solid waste management, Efficient urban mobility and public transport, Assured water and electricity supply

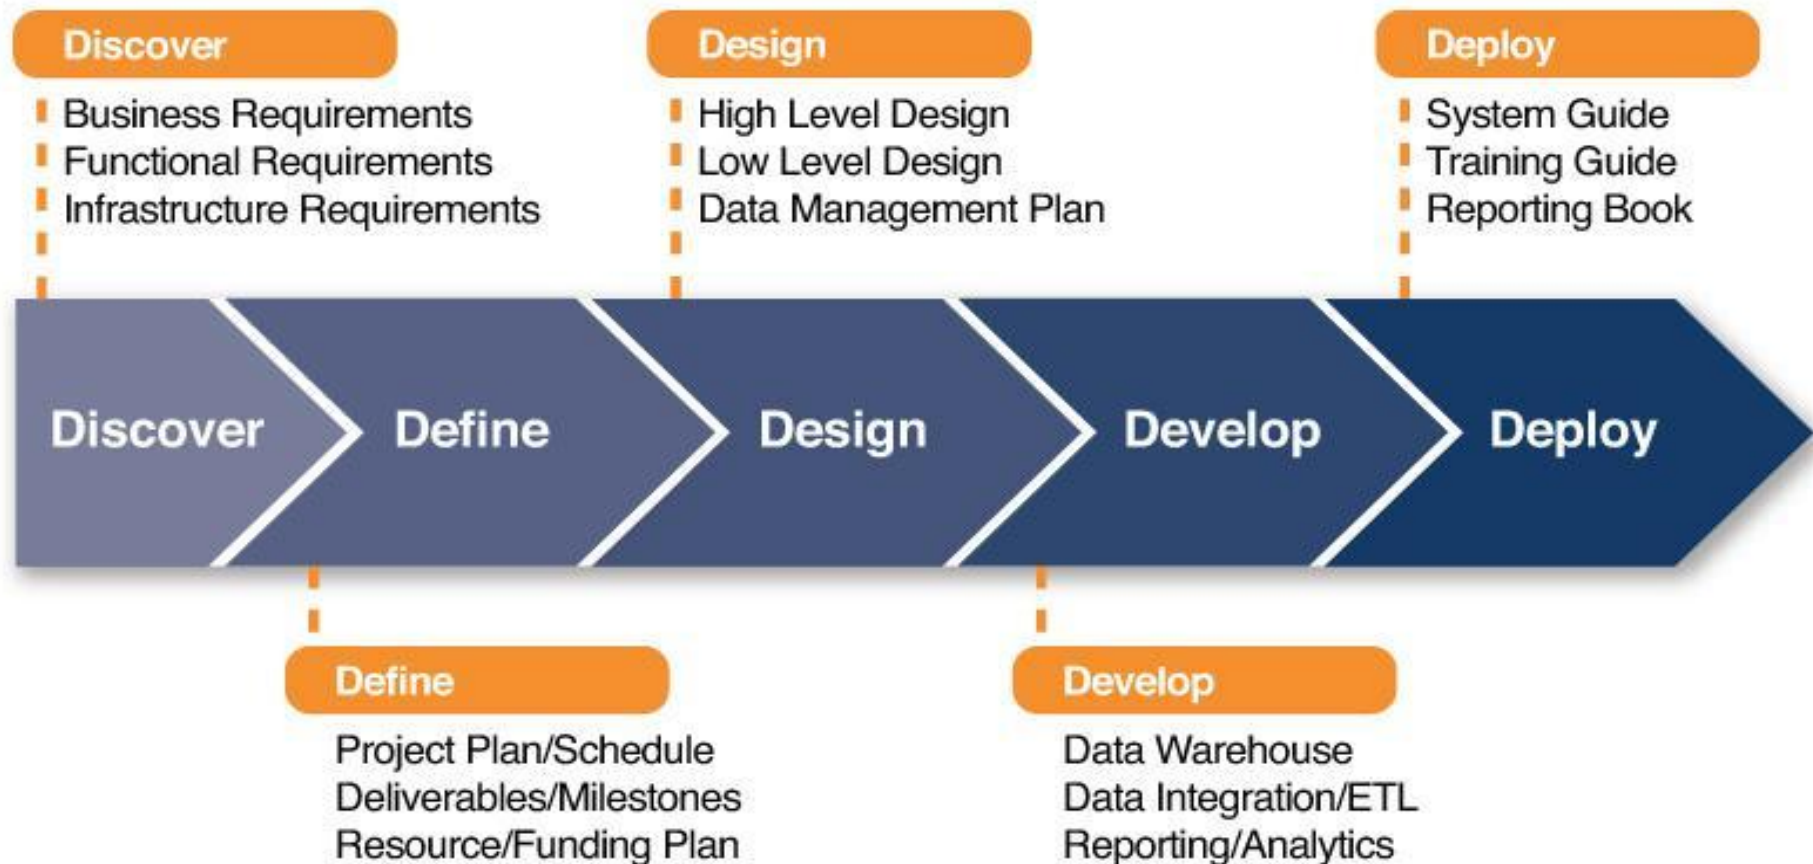

We drive you all the way through Conception, Initiation, Analysis, Design, Coding, Testing, Implementation and Maintenance stages that ensure you have the robust software meeting your goals and initial requirements.

## PROJECT LIFE CYCLE

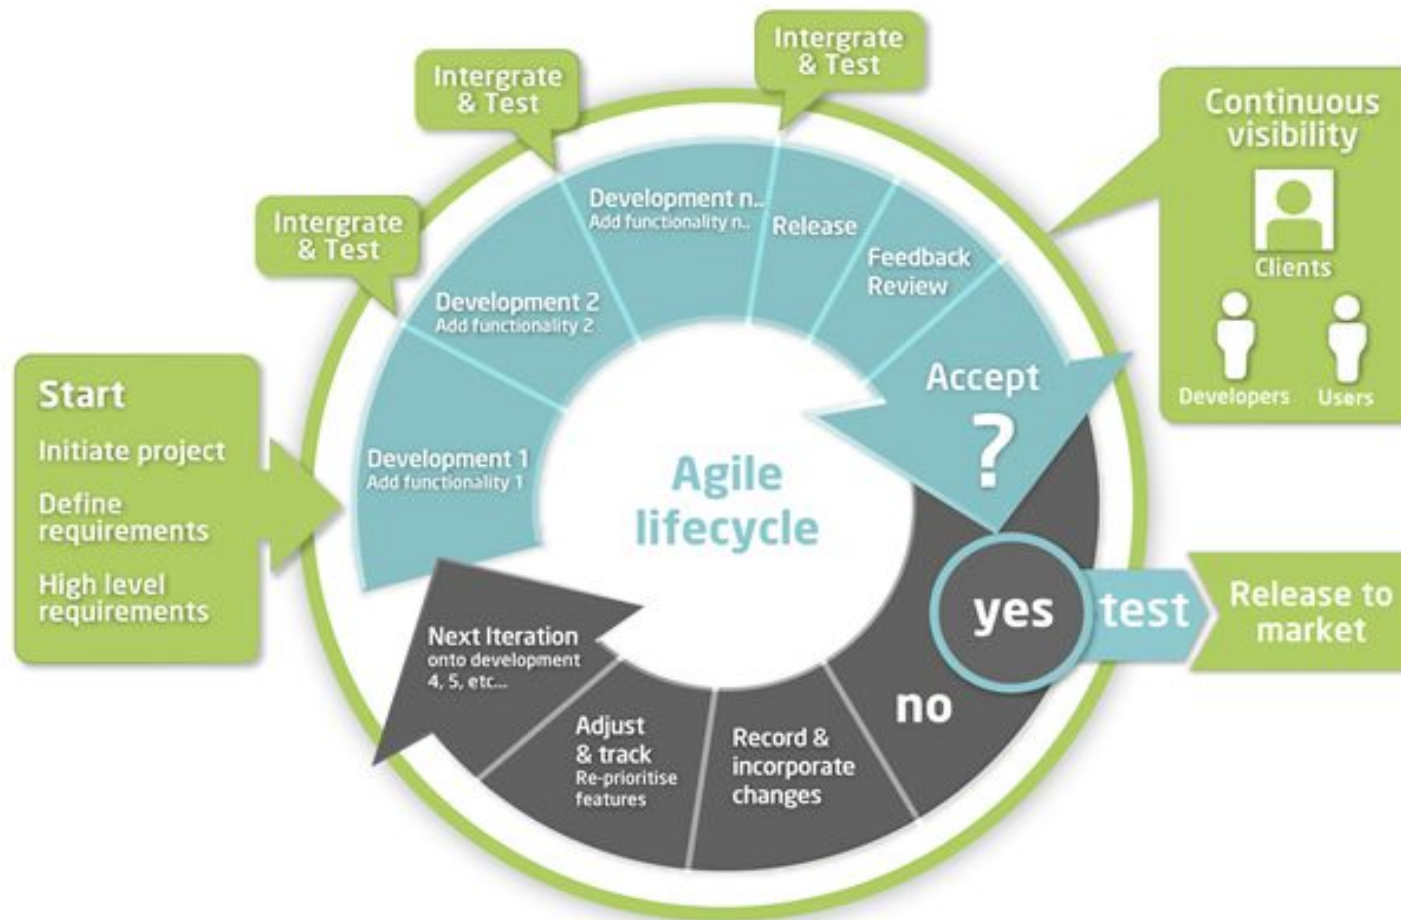

# Methodologies - Waterfall

We drive you all the way through Conception, Initiation, Analysis, Design, Coding, Testing, Implementation and Maintenance stages that sure you have the robust software meeting your goals and initial requirements.

# Methodology - Agile

Based on continuous iterations each having its own Design, Development, and Testing Cycle, our Agile process enables to deliver you solutions faster, with less need for detailed documentation, i.e. for less investment costs and with shorter time-to-market.

## Task Management & Bug Tracking
